

SmartGuard Features list [Detailed] - Continued

	Feature	Viewed By	USL Comments	S4B Comments
5.	TRANSPORT			
a)	View personal data of drivers and car commanders.	<ul style="list-style-type: none"> - HR - Operations - Transport 		Already done - Under HR
b)	View report showing the average fuel consumption of the vehicles.	- Transport		
c)	View report showing daily mileage data for all vehicles.	- Transport		
d)	View report showing distances between assignments and alarms.	<ul style="list-style-type: none"> - Transport - Operations 	This will be used to verify the daily mileage reports filed by the drivers.	This means that USL will provide all the distances between the different points of location of assignment and alarms.
e)	Vehicle maintenance score board.	- Transport	Keep track of the vehicles maintained and which parts were changed.	
f)	Drivers' and car commanders' performance score board.	- Transport		We need to be given which information here is being saved
g)	Vehicle inspection score board.	- Transport		Please forward the list of sections/parts you check on the car, parameters you look for and the nature of data stored (e.g., is it "100%", "The vehicle was badly damaged" or "A"?)

h)	Report for monthly fuel consumption and their prices at the time of recording.			We need the data and format that will be shown in this report.
i)	A database of all parts of the vehicles of Ultimate security with pictures for quick reference.	- Transport	A book will be provided to S4B with the vehicle parts and their data. It will be scanned and each picture attached to the respective section of the parts. This will allow quick reference and thus doesn't require physically having the book around.	This is a lot of work and is out of scope of the system as described in our specs. Please contact the GM for his approval before this is done.
